EDUCATION

Punjab Engineering College   Chandigarh
Computer Science & Engineering | B.Tech   2021 - 2025

Government Model Senior Secondary School, Sec-35 D   Chandigarh
Non - Medical | XII   2020
Percentage: 82.4%

EXPERIENCE

Department Of Governance Reforms | SDE Intern   Mohali | Feb 2024 - Aug 2024

- Developed and maintained a **Centralized Admission Portal** facilitating the enrollment process for **over 100,000** students across various colleges in **Punjab.**
- Spearheaded the development of an online integration system from **scratch**, transitioning government departments in Punjab from **paperwork to a digital platform** for seamless information transmission and integration with the **State Data Centre (SDC).**
- **Tech Stack - Angular**, **Dotnet**, **SQL Server**, **Dapper**, **SignalR**, **SwaggerUI** and **Postman**.

SKILLS

Programming Languages: C/C++, Python, Javascript, Typescript
Libraries/Frameworks: Angular, React, DotNet, Dapper, SignalR, SwaggerUI
Tools/ Platforms: Git, Github, ChatGPT, VS Code, Postman
Databases: Microsoft SQL Server, MongoDB, Firebase

PROJECTS

Steller Shop : E-commerce Application | Live   *React / JWT / Node.js / MongoDB*
- Successfully developed and implemented a e-commerce application, showcasing proficiency in authentication, dynamic data fetching, and user-centric design.
- Paid attention to user experience by implementing features like search, filltering, and a visually appealing shopping cart interface.

Crafter's Corner : Workspace Management App | Link   *Angular / Dotnet / SQL Server/ Stripe*
- Created a seamless, secure and user-friendly platform for artists, coaches, and hobbyists to find and book spaces that cater to their unique needs.
- Stripe integration provides secure and seamless payment processing, enhancing the platform's reliability and overall utility.

StreamLine : Task Management App | Live   *HTML / CSS / JavaScript / React / Firebase*
- Designed for individuals and teams, this application seamlessly integrates the dynamic capabilities of React for a responsive frontend and Firebase for a secure and efficient backend.
- Effortlessly create and edit tasks with detailed information and adapt to changing priorities

CERTIFICATES

- Learn Python Programming Masterclass by Tim Buchalka and Jean-Paul Roberts - **Udemy**
